Maxine Zhou

Product Designer | UX/UI | Design Systems

London, UK | 07943924015 | maxinezhou0302@outlook.com | https://maxine-zhou.com

SUMMARY

Product designer specialising in design systems for complex enterprise SaaS. Main contributor to a design system migration across 16 enterprise products, delivered 49 tokenised components, full documentation and Storybook integration for design-to-code parity. I established the governance model that keeps 10 designers across 3 agencies working to one standard, and used adoption audits to decide what the system builds next. A fine art background informs how I handle typography, colour and craft when translating brand into a system.

EXPERIENCE

Product Designer, Pangaea Creative

Mar 2024 – Present

Client-facing role, embedded within client product and engineering teams — *London, UK*

Convex Insurance (client): enterprise design system, underwriting platform, AI contract analysis product

- Main contributor to a design system migration across 16 enterprise products, reducing custom components by 94% on the core product pilot through 49 tokenised components with variants and states, full documentation and Storybook established with frontend engineers as the single source of truth for design-to-code parity.
- Designed and implemented themes for new products, defining typography, colour, iconography and layout decisions so the component library stayed aligned with brand guidelines and accessibility standards as it grew.
- Established the governance model across 10 designers and 3 agencies, held weekly design critique, weekly office hours for business analysts and product managers, and component workshops that grounded variant sets and conventions in real usage.
- Ran drift audits with designers and frontend engineers, reconciling the Figma library against Storybook component by component so design and code stayed one source of truth.
- Redesigned the internal underwriting platform as sole designer. Analysed 7,090+ sessions and found only 46.1% of users reached the main detail page. Projected to save 45+ hours/month across underwriting teams and shipped after handoff.
- Owned end-to-end design for an AI-assisted contract analysis platform, from process flows to detailed interaction specifications covering component states, edge cases and error scenarios, bringing workflows scattered across 5+ tools into one product for reviewing 200+ insurance contracts. It shipped and has since been white-labelled by the AI development partner, which now sells it as a service.

Pre-launch startup (client): Lead Product Designer, 0-to-1 mobile app

- Defined and designed the companion app (42 MVP features) end to end for iOS and Android for a Kickstarter launch, coordinating an industrial design studio, two engineering teams and the founder.
- Kept design moving with 46 hardware dependencies unresolved by triaging written assumptions by rework risk. Of the four later proved wrong, none required a screen redesign.

Junior Product Designer, Radically Digital

Oct 2023 – Jan 2024

UI-focused role, streamlining designs to reduce technical debt for development team — *London, UK*

- Delivered interaction design and prototyping for client pitches, including a successful proposal for JCDecaux.

SKILLS

Design: UX/UI Design, interaction design, information architecture, design system governance, user flows, rapid prototyping, accessibility and inclusive design (WCAG)
Research: User and stakeholder interviews, contextual enquiry, user journey mapping, usability testing, behavioural analytics (funnel analysis, heatmaps, session recordings)
Tools: Figma, FigJam, Storybook, Adobe Creative Cloud, Miro, Jira, Confluence, Claude Code, Figma Make

EDUCATION

Brunel University London — *Oct 2021 – Dec 2022*
Master of Science in Integrated Product Design

Sichuan Fine Arts Institute — *Sep 2017 – Jun 2021*
Bachelor of Arts in Public Art
