

Maxine Zhou

Product Designer | Design Systems | Enterprise and B2B SaaS

Maxinezhou0302@outlook.com <https://maxine-zhou.com>

Summary

Product designer with three years on enterprise and B2B SaaS, turning dense operational workflows into interfaces people can move through quickly. I work end to end, from research and information architecture to dev-ready specifications, and I own the design system underneath: 49 tokenised components across a 16-product ecosystem, built with frontend engineers in Storybook. I make decisions from evidence rather than assumption, and AI tooling is part of how I work. Everything I have worked on has shipped.

Experience

Pangaea Creative (London)

Product Designer (UX/UI)

Mar 2024 – Present

UX/UI Design

- Owned end-to-end design for **AI-assisted contract analysis platform** supporting review of up to 200+ insurance contracts, conducting stakeholder interviews, defining information architecture, iterating design based on usability testing, and delivering dev-ready specs.
- Led UX redesign for internal underwriting platform used by 18 underwriting teams, supporting **2700+ monthly sessions** and 224 hours of active usage per month.
- Ran usability sessions and watched session replays alongside funnel analysis and heatmaps, using what I learned to make decisions rather than defend them.
- Defined problem statements, user journeys and MVP scope in **cross-functional partnership with Product and Engineering**, grounding design decisions in technical feasibility and business viability.
- Applied AI-enabled design practices day to day (Claude Code, Figma Make) to accelerate exploration, prototyping and specification.
- Lead accessibility for a client serving guests with disabilities, building an AI-assisted knowledge base that organises findings by vision, cognitive, motor and operational need for reuse across briefs.

Design System Design

- Established and ran the design system governance model aligning **10 designers across 3 agencies**, leading workshops, knowledge-sharing sessions and usage audits to hold UX quality and consistency across **16 enterprise products**.
- Main contributor to the design system migration across 16 enterprise products, **reducing custom components by 94%** (core product pilot) through delivery of 49 tokenised components, full documentation and Storybook integration.

Radically Digital (London)

Junior Product Designer

Oct 2023 – Jan 2024

Delivered interaction design and prototyping for client pitches, including a successful proposal for JCDecaux. Role concluded due to team redundancy.

Education and Certification

Brunel University London (MSc) Integrated Product Design

Oct 2021 – Dec 2022

W3C, edX Verified Certificate Introduction to Web Accessibility

Jul 2026

Skills

Tools: Figma, FigJam, Storybook, Adobe CC, Miro, Jira, Confluence, AI tools (Claude code, Figma Make)

Design: Product Design, Typography, Interaction Design, Accessibility, WCAG, Design Systems, Information Architecture, Illustration
